University of Maine System COVID Data by Campus

36 — Known cases of UMS students or employees in public health agency isolation among the more than 30,000 students, faculty, and staff in the University of Maine System community.

The University of Maine System has started the spring semester. These data would also include university students or employees known to have an active case of COVID-19, but not necessarily living in the campus region or state.

- 18 UMaine:
- 4 UMA:
- 3 UMF:
- 0 UMFK:
- 0 UMM:

When an individual completes the isolation period, the active case number shared in the Together for Maine daily update is reduced to reflect that change.

UMS is reporting 36 known cases today, 3 cases more than reported in the last update. Today's data reflects 3 new cases and 6 completions of isolation since the last update. Prior updates are archived at [Together.Maine.edu](#).

7 of the current active cases are residential students

- 98% of university-administered quarantine space currently available
- 97% of university-administered isolation spaces available

Asymptomatic Screening Update for 20–21 Academic Year

- 163,996 Test Results to Date
- 596 positive results representing new diagnoses of COVID-19

The Asymptomatic Screening Dashboard at [Together.Maine.edu](#) represents known results on all asymptomatic tests going back to July 22, 2020. About 48 hours passes from the time a test sample is collected and when the results are known.
