Subject: Re: Request from Assoc. Dean Cole & Senior Assoc. Provost St. John

To: College of Liberal Arts and Sciences, UMaine <clas@maine.edu>

Tim,

I taught CMJ 404: Risk Communication during Spring 2020, and, as such, COVID-19 figured its way into almost all of my lectures after Spring Break (and even some before then, when we mentioned the novel coronavirus in class several times). I am attaching the following:

- (1) a PDF of one set of slides (from the lecture on trust and social amplification of risk, in which I used COVID-19 as a case throughout)
- (2) the syllabus from Spring 2020
- (3) the final exam for the class, which was to come up with a risk communication case study of COVID-19 in the style that the students had been studying throughout the semester (I have the class set up so that the main concepts/theories are taught via historical or contemporary examples of human health/environmental risk, e.g., climate change, silicone breast implants in the early 1990s, etc.)

If you would like more information, please let me know. With two pre-school- aged kids at home, I was unable to reach out before now, but I am passionate about representing the expertise in risk communication we have at the university which is (arguably) as important as the biological and public health research that we are -- and should be -- highlighting.

Best wishes,
Laura

Dr. Timothy M. Cole
Associate Dean for Academics, College of Liberal Arts and Sciences
Associate Professor of Political Science
University of Maine
