How do self-administered T3 tests on campus work?

January 7, 2022 | [Faculty and staff information](#), [Health and safety](#), [Student information](#), [Testing](#)

Shield T3 self-collected COVID-19 saliva test kits will be used for symptomatic testing on campus during the 2022 spring semester. The self-collected test kits do not require an appointment.

Pick up and drop off your Shield T3 self-collected COVID-19 saliva test kit at Estabrooke Hall during the testing days and times: Monday–Thursday, 8:30 a.m.–5 p.m.; Wednesdays also 6:30–8:30 a.m.

Read the instructions included in the test kit to understand the process fully before beginning your sample self-collection. [A how-to video is online.](#)

Note: After collecting your saliva sample, you have **12 hours** to: 1) activate your test kit in [PointnClick](#), the UMS COVID-19 portal and then 2) drop off your sample at Estabrooke Hall at the times listed above.

Test results are typically available within 24 hours.

Instructions for activating your kit:

- Log into [PointnClick](#) using your UMS username and password
- Be sure you've activated the [COVID-19 Testing Consent form](#)
- Click the "Home Kit Activation" link in the left-hand menu and continue to the next page
- Enter your 12-digit specimen number and 5-digit test kit number, both found under the barcode on the sample tube; note that an error message will result if numbers are in the incorrect fields and they will need to be reentered
- Click "Submit" at the bottom of the page to receive a "Success" confirmation
- Drop off your sample at Estabrooke Hall at the times listed above

For assistance in using [PointnClick](#), including accessing your test results, please visit the [UMS PointNClick Web App User Guide](#) or contact the [US:IT Help Desk](#).
