The Fogler Library Reference Department at UMaine has created a guide with a [collection of online resources for K-12 families, students, and teacher](#). The guide includes a mix of licensed resources available to Maine residents, open-access resources, and temporarily open-access resources.

“Whether it is help with homework or the resources of Maine’s largest research library, the staff at UMaine’s Fogler Library is here to help students succeed as remote learners with a new online resource guide for K-12 students, their families, and educators.” — Joyce Rumery, Dean of University Libraries

Additionally, the K-12 community is encouraged to contact our librarians if they need help finding information resources.

The K-12 Online Resources Guide was created by Amber Gray, Social Sciences and Humanities Librarian. Gray is the reference librarian for education students and faculty at UMaine.
