What special cleaning is being done on campus in response to COVID-19?

December 14, 2020 | Health and safety

According to federal health and safety guidance, no special personal protective equipment (PPE) or cleaning processes are needed for cleaning above and beyond normal practices. UMS Safety Management has instituted protocols for use of disinfectants rated to work on coronavirus. Restrooms campuswide are cleaned and disinfected daily. Hand sanitation stations are being added campuswide. The UMS Scientific Advisory Board has a fact sheet on disinfection and cleaning during the pandemic.
