Welcome to Day 1 of the COVID-19 Misinformation Challenge!

This email is the first in a daily series you'll receive this week. Each email will have a task designed to be fun and informative, while also testing your knowledge of COVID-19.

Today's Challenge: Determine Which Social Media Posts are Accurate (or Not)

There are numerous posts in our social media feeds related to COVID-19. These often come from people and organizations we trust. But, how reliable is the information being shared?

Let's Get Started with Day 1: The Virus Goes Viral!

[Follow this link to view three social media posts and test your knowledge of their accuracy.](#)

If you have questions or comments about today's task, please get in touch.

All my best,

Jen Bonnet
