UMPI GIS professor Dr. Chunzeng Wang is providing a [daily GIS-themed Facebook post](#) on the COVID-19 situation in the State of Maine. His [daily infographic map](#) uses Maine CDC data and GIS mapping technology to show the number of COVID-19 cases (confirmed, recovered, deaths, hospitalized) in each county.

The infographic also provides at-a-glance information on the number of negative tests, a break down on cases by sex and age, and cases in neighboring New Hampshire, New Brunswick, and Quebec, as well as total cases in the United States and Canada. A contribution from UMPI's GIS Lab, the effort is also part of the Maine Geospatial Institute's response to the current situation.
