GPR COVID-19 Announcement

April 1, 2020

[Greenhouse Plastic Recycling Program Updates](#)

Drop-off locations for greenhouse plastic recycling will not open until on or about June 21, 2020.

For growers and farmers ready to recycle their plastic before June 21, we encourage you to participate in the program by storing your plastic in a clean and dry location until your local drop-off site is open. Please refer to instructions for estimating number of plastic bundles, cutting, folding and storing your plastic (coming soon).

Online registration for dropping off plastic bundles will open approximately two weeks before the drop-off sites are open to the public.

We will continue to assess the evolving COVID -19 situation and will post periodic updates on this website.
