Knowledge bites

December 16, 2020 | [Teaching in brief](#)

The University of Maine New Media program is teaching digital skills to high school and community college students and staff in a free webinar series. "Knowledge Bites" explores various technological topics, including how to code an HTML game, create memes with Photoshop, craft 2D animations and more, through hands-on learning activities. New Media program faculty teach the online workshops via Zoom. The first webinar on Dec. 10 focused on how to code a simple mobile app.
