Free University COVID-19 Course Content Now Available Online

17
JUN 2020

A free online lecture series to help students and the public better understand various aspects of COVID-19 from privacy rights to economic impact has wrapped up but the content is available online. Initiated by the University of Southern Maine's Muskie School of Public Service and the University of Maine Graduate and Professional Center, hundreds of Mainers signed up for the lectures that were led by University of Maine System experts in the fields of public health, policy, law and business.

Recordings of the lectures — which focused on how we understand, track, mitigate and recover from the impacts of the global pandemic — [can be found here](#).

They include:

- [Epidemiology of COVID-19](#) (With special guests Maine CDC Director Dr. Nirav Shah & MaineHealth Chief Health Improvement Officer Dr. Dora Mills)
- [Public health systems and health policy](#)
- [Missteps in managing a pandemic](#)
- [Global disparities in impact and outcomes and the immigration crisis](#)
- [Privacy rights and freedoms during the pandemic](#)
- [Rolling impacts on the US and global economy and workforce impacts](#)
