SEANET Educational Goals:

• Create statewide educational collaborations, partnerships and innovative programs focused on SEANET research and aquaculture.

• Improve Maine’s workforce preparedness in Science, Technology, Engineering, and Mathematics through K-20 teacher and student opportunities.

• Increase Maine’s capacity to conduct research on a statewide level.
• Curriculum Toolkits
• Internships
• Teacher Professional Development
• Seed Grants

• Afterschool programming
• Summer Camps
• Workshops and conferences
FOSTER CENTER INTERNSHIPS

• Ten Internships for college students with aquaculture industry partners.

• Students work with the UMaine Foster Center for Student Innovation to learn innovation engineering practices and develop a skill set to create, test, and achieve new ideas.
