L. W. BACHELDER, Treasurer.
REPORT OF SUPERVISOR.

DISTRICT NO. 1.

Manley M. Judkins, Agent.—The spring term was again taught by Miss Caro E. Wyman, whose pupils were alert and diligent. Recitations were made practical and the general exercises in physiology and grammar together with biographical sketches of some of our leading poets were very helpful. An innovation in this school was the introduction of singing; even the youngest made creditable proficiency and instead of being detrimental, it seemed to give zest to other studies. Parents and others were present at closing exercises, a worthy example which should be more generally followed.

The winter term was by Miss Rosalind Pierce of Fairfield. This teacher possesses tact and good governing ability but further preparation and training would greatly aid her in her work. Classes in mathematics, history and geography reviewed well. Pupils in lower grades of reading were very properly required to repeat the substance of the lesson; they were also drilled on the elements of grammar, use of capitals etc. The smallest attendance of any term within our remembrance.

DISTRICT NO. 2.

Isaac Gowell, Agent.—A short summer term was taught by Miss Alice G. Taylor of Sidney. This young lady was too indulgent and for every inch given, an ell was taken; as a natural result neither the order nor improvement satisfactory.

Winter term by Miss Alice H. Hodgkins of North Chesterville, who has successfully taught several terms in town. School small and very restless. The boys are possessed of a superabundance of nervous energy, a portion of which was directed into useful channels by various exercises aside from the regular routine work—such as copying portions of reading exercises in script, map-drawing &c., in which much interest was taken and progress made. Much time and drill in reading to secure proper expression. Miss H. is very conscientious in her teaching and favorable results were reached in all branches.
DISTRICT NO. 3.

Abner Hammond, Agent.—The spring term was in change of Miss Alice A. Dunn, who, at the beginning found more work than seemed necessary, but soon remedied it in a measure by better classification. This duty is often a difficult one as our ungraded schools are composed of pupils of all ages and capacities.

Two classes should never be separated by a few pages. Put them together; give them the benefit of each other's aid, and economize time.

If some have greater ability to prepare a longer lesson, let them spend their extra time on some other study. Excellent reviews were taken in algebra, arithmetic and history, and the younger pupils were carefully looked after. Extra good attendance; seventeen not absent for the term.

Miss Grace L. Cowan of Sidney, instructed the fall term. This teacher has excellent methods, is active, and spares no labor to advance her scholars. She seems especially adapted to interest and instruct young pupils, who made fine progress in learning to read and write script, as also in numbers. She was very critical to have all express themselves in correct and complete sentences. Had Miss Cowan commenced a little firmer in order, her work would have been easier and pleasanter.

The winter term by Mr. Verne G. Day of New Sharon, who has confidence, tact and energy, and displayed good ability as a disciplinarian—the right man for the place at this time. Although some of his methods are not up to the present standard he endeavored to make his work in mathematics practical by original test questions and drill. Penmanship was taken by the whole school and an examination of the books disclosed neatness and improvement. Some young pupils made a good beginning in algebra. The older scholars gave most of the time to review work.

DISTRICT NO. 4.

Nathan Knowles, Agent.—The schools for the year were conducted by Mrs. Ellen M. Knowles, who has had much experience in the school-room. The improvement in reading was such that the majority of the pupils advanced a grade. The primary class in arithmetic completed the book, was drilled on the fundamental rules and processes, and proved themselves apt and thorough. They also did nicely in general exercises. Will not particularize further as all were evidently interested and made visible progress in their several studies. A good attendance and average.

DISTRICT NO. 5.

Alton Wadleigh, Agent.—Both terms were under the care of Miss Izetta Royal of Readfield. This was her first work in this direction, and without special preparation, there was not that system
and method that comes from experience and training, but having a clear quick intellect, self-possession, and anxious to succeed, we found at our subsequent visit that she was gaining in efficiency, and her pupils in knowledge. All acquitted-themselves well. Order and attendance good.

**District No. 6.**

Joseph S. Cummings, Agent.—A short spring term was taught by Miss Elnora Farnham, who with natural ability to learn and impart, united with confidence, succeeded in making this a profitable school. In reading, the definitions of difficult words were given, then required in succeeding reviews. In most branches very good improvement.

Fall term by Miss Fannie M. Frost of Monmouth. The benefit of the course at F. S. N. S. and twelve terms teaching, enabled Miss F. to begin her labors systematically. Oral class in physiology, consisting of nearly the entire school, was enthusiastic. Principles in arithmetic were dwelt upon, and problems analyzed as well as performed. Rules for reading were well-applied. Practical work in geography.

Winter term was under the direction of Mr. L. J. Norton of Farmington, a graduate of F. S. N. S. and about to enter Wesleyan University. By education and training he is qualified to have a school of much higher grade under his tuition. At our visits much pains was taken in reading to have the pupils conversant with the author's meaning. The higher class in arithmetic—two of the members quite young—made sufficiently rapid progress. Had work equal to the capacity of some in the lower grades been assigned and required, their advancement would have been more perceptible. Mertie Whitehouse and Rosa Yeaton, aged ten and twelve, were not absent one half day for twenty consecutive weeks.

**District No. 7.**

H. C. Minot, Agent.—Miss Delia C. Bragg of Sidney had this school in charge, and at each visit, the little girls composing it merited much praise for their examination. This teacher imparted valuable information upon various subjects, which was brought into the general exercises. They had evidently received good drill, and promptness was their motto. No absentees for the term.

Miss Bragg was engaged for the winter term, but at the expiration of two weeks, a severe illness compelled her to relinquish her charge into the hands of Miss Elnora Farnham, who continued the work much the same as in her school already reported. A good school.

**District No. 9.**

George Cottle, Agent — The schools for the year, practically one term of eighteen weeks, were instructed by Miss Caro E. Wyman.
Much care was given the reading lessons as to pronunciation, inflection and import; two young pupils learned to read both print and script readily by the word method. Surprising skill was acquired and evinced in computation of numbers. The recitation of mottoes—selections from prominent authors—by the school, formed one of the opening exercises. Oral class in physiology, worthy of commendation. Weekly written reviews in other studies taken, made the subjects familiar and thorough. In this district are some keen scholars and all are orderly and well disposed.

**District No. 10.**

Henry Farnham, Agent.—In the spring, Miss Sadie L. Spaulding again took this school in charge, and in an easy, yet firm manner, conducted it to a successful close. The pupils performed their tasks with zeal and alacrity. Illustrations of their work were made upon the board with neatness and accuracy. An interesting, profitable little school. In the winter term was under the control of Miss Roxa F. Kelly of Rome who secured a good attendance. Some were studious and did well, others lacked both drill and study. All endeavored to give the teacher as little trouble as possible, much to their credit.

**District No. 11.**

Ira B. Tracy, Agent.—The school year was divided into three terms, all under the instruction of Miss Jennie E. Lord of Augusta. By at once gaining the confidence and respect of pupils and parents, she gained their co-operation, a very potent factor in the success that followed. Marked improvement in penmanship. Book-keeping well handled. In algebra and most other branches the quality of the work good. Attendance excellent. We think the ambition of some pupils prompts them to carry too many studies. Better go a little slower and husband their strength for future use.

**Districts Nos. 12 and 13.**

George Lord and Frank B. Ham, Agents.—As usual the schools in these districts were alternated. After considerable difficulty, the agent secured the services of Miss Roxa F. Kelley of Rome for a short spring term in No. 12. Miss Kelley has the physical ability to withstand the wear and tear of this profession, and with improved methods gained from observation and training, will make a successful teacher. The scholars were interested and made good recitations. The agents, appreciating the advantages of uninterrupted work, engaged Mr. Henry J. Page for the winter terms, the latter being still in session. After continuing four weeks, its forces were doubled by reinforcements from No. 9. The teacher is interested and painstaking in his work, and tries to have his pupils deduct and apply principles. Some very good maps were drawn and placed upon the walls, to be used in recitations. Proper attention paid to reading. Scholars are advancing in all their studies.
DISTRICT NO. 14.

Mrs. H. M. Merrow, Agent.—The spring term was begun by Miss Mary L. Davis of New Portland, but at the close of the second week she was obliged to leave on account of illness. The term was then finished by Miss Lelia Morse of Norridgewock, a young and comparatively inexperienced teacher, but who exhibited laudable energy and push, and an aptitude to teach which should be supplemented by a course of Normal training. The school continuing late the warm weather detracted somewhat from the interest.

Fall and winter terms—the latter still in progress—by Miss Eula C. Hersom. We found the school well organized, industrious and under good discipline, three very essential requisites. Miss Hersom’s motto was quality rather than quantity and the latter was not won at the expense of the former. Rules deducted from the analysis of problems. A small class beginning the study of grammar recited the rules and definitions without catechising, and applied them very well. Topical recitations in history, good. An appropriate motto was given daily. A gloom was recently cast over this school by the passing of Eddie Mack, a bright, active boy, to that Higher School, to receive instruction from the Great Teacher “whose wisdom passeth our understanding.”

DISTRICT NO. 15.

Llewellyn K. Stevens, Agent.—No summer school. Winter term by Mr. Fred L. Hutchins of Oakland. Formerly one of the largest, now classed among our smallest schools, and unfortunately it is so situated, it cannot conveniently be united with any other. In physiology, an exceptionally good review. Subject matter of reading lessons required; one young pupil made remarkable progress in the latter branch, and spelling. Two little boys were very bright and apt in all their recitations. The teacher was faithful to his charge; he contemplates a course of Normal training which will be very helpful.

DISTRICT NO. 17.

Chester B. Lovejoy, Agent.—The summer term was under the care of Miss May B. Farnham, whose manner is pleasant and easy in the school-room. The work was prosecuted in the usual manner. At our visits, scholars attentive to studies, and reviews indicated advancement, though the term was very short.

In winter, Miss Bertie B. Libby of Oakland, instructed a long term of fourteen weeks. This lady has had considerable experience in the schools of her town, and took this little school in charge with confidence. Believe she labored with fidelity. When the last visit was made, most of the pupils were absent on account of sickness. Those present reviewed especially well in arithmetic, geography and physiology.
REMARKS.

FELLOW-TOWNSMEN: — In presenting this, our report, it would be pleasing to say that results commensurate with the expenditures, have been obtained in all our schools. Such is not the case, never has been, and never can be, under the present system. The most have been good, some excellent, and why all have not reached the latter standard, is no mystery when we consider how few in medicine, law, mercantile and other pursuits reach the goal for which they strive. If failure or partial success follows a life given to a definite purpose, ought we not to expect shortcomings in our teachers, many of whom are young, comparatively inexperienced, and without special preparation.

That the agents in most districts took pains to secure the services of good teachers, we personally know, and owing to the lateness of their election, much extra trouble was given them to engage suitable ones for the spring terms. It would seem a proper time for all districts to hold their meetings immediately after the annual town meeting; ample time would then be given to make engagements and all necessary repairs.

No schools have been taught in Districts Nos 16 and 18, the past year, the number of scholars too few to make it advisable. Provision was made for those in the former to attend at No. 14, which was mutually agreeable. Those in No. 18 were allowed to attend in No. 3. The cost last year in No. 16, for an average of less than two pupils was sixty dollars; in No. 18, for an average of two in the fall term, fifty dollars.

With due regard for the interests of scholars and tax-payers, these changes were made and we trust all will concede their justice.

The number of scholars in town the first of April was less than last year, and the attendance in many schools much smaller, as will be seen by comparison of the tabular statements, yet taking into account the age of the pupils, the scholarship ranks higher than in the past. And here we would say we have in our schools quick, bright, delicate children with nervous organizations highly developed, who need very little forcing and ever the watchful care of parents and teachers.

The intention of the law in regard to book-keeping being taught in our schools, was, that all pupils should have a knowledge of simple accounts; that is, be able to keep farm, carpenter, blacksmith and trader's accounts neatly and accurately. This can be learned simply and easily in the natural order by taking Single Entry, first, then at most, two or three sets in Double Entry. We find these views in accord with those of the State Superintendent.

No one thing tends more to excite a healthy emulation, and love of study among scholars than visits to the school by parents and friends. They far attended with the most beneficial results to the scholars, and furnish a powerful incentive to the teachers.

Channing says: "To educate a child perfectly requires profounder thought,
greater wisdom than to govern a State." How important that instructors should be clear-headed and thoroughly prepared for this great work.

A pebble in a streamlet scant
Has turned the course of many a river;
A dewdrop on the tender plant,
May warp the giant oak forever.

Thanking all for their kindness and co-operation, this report is
Respectfully submitted,

H. F. D. WYMAN, Supervisor.

Belgrade, Feb. 18, 1889.
