Annual Report of the Water Commission

We herewith submit the annual report of the Water Department.

During the past year we have extended our 6" mains a distance of 1100 feet connecting Wheeler St. and Penley St. with High St. also continued the extension which we started in 1931 from Bolster Place on Myrtle St. connecting with the 6" main on Gothic St. These extensions complete two important projects for domestic service and fire protection, so that now practically all houses in the Corporation are brought within 500 feet of a hydrant. For the present we do not recommend further extensions to our system in the village.

At our source of supply, to protect same from contamination, we have finished clearing land owned around Stony Brook Dam and have fenced with woven wire fencing.

As we have mentioned in previous reports, we have two problems in our source of supply which deserve consideration in the near future. First we should replace Cooper Spring Dam, which is in very bad condition, with a new dam built on a level with Stony Brook Dam. This would equalize the pressure on both dams and increase the storage about 300%. Second, the 6" pipe of our supply line which passes over a summit 13 ft. above hydraulic grade line near the so called Sam King orchard, should be changed to a lower grade, which would increase the capacity of the supply line about 50%.

As to finances of the Water Department, during the past year we retired $5000.00 of Bonds bringing our indebtedness to $17,000 and with cash on hand at present we should reduce it to $10,000 during the present year.

Respectfully submitted,

C. O. BARROWS,
A. F. GOLDSMITH,
O. K. CLIFFORD,

Water Commission.

The firemen regret very much the death of Chief Robert E. Wise. He spent much time and work on improving and developing the department and his loss has been greatly felt by us.

The engineers and firemen thank the corporation for the money they voted us last corporation meeting, for a motor truck. We consider we have a good piece of equipment for the amount of money which the corporation gave us.

We found we could not build a body or buy one on a chassis for within five or six hundred dollars of the thousand which was appropriated. But we bought a
Ford Model T, used the body and chemical tanks on the Dodge chassis, and by using about $300 of our regular appropriation which should have been spent for new hose, we have mounted the body and tanks and other pieces on the truck, closed in and heated the apparatus room, and built over the concrete driveway, all labor being done by the firemen, free to the corporation.

We are asking for an appropriation for a booster pump for the truck. The chemical tanks are all right for a chimney fire but they are very destructive to fabrics which they hit, and a pump can be used anywhere there is water.

On our regular appropriation we have used this year over three hundred dollars for improvements (which we have explained elsewhere). This money should have been spent for new hose, as we are using some now which in case of a fire where we have to lay five lines that was bought in 1917 and the last new hose was bought in 1930.

This year there should be about $500 spent for new hose and we would also like some new nozzles which could be fitted with tips, which if we had to turn water into a store or house where there is a small fire, would not do so much damage.

WM. G. CUSHMAN,

Acting Chief Engineer.
Annual Corporation Meeting

To the Legal Voters of the South Paris Village Corporation:
