MAYOR'S ADDRESS

Gentlemen of the City Council:

We meet to begin the duties of managing the municipal affairs of the second largest city in the State. The municipal corporation has two functions, one political, one business. Primarily it is a political subdivision of the State, subject to the control of the legislature, and having certain public duties to perform which it cannot escape, among which are support of poor, education of youth, police and fire protection, maintenance of highways, and care of public health.

This administration is confronted by a task of difficulty as great as that which has ever faced any administration since the incorporation of the city in 1863.

It has been customary to incorporate in inaugural addresses what is called,—rather by courtesy than by fact,—a “Financial Statement” of the city. In obedience to custom, such a statement, given out by the city auditor, is incorporated herein. It is of no actual assistance to the citizens to determine the true condition of the city's finances at the present moment. The statement of liabilities can be relied upon. The statement of assets, if made by a business concern, would be considered visionary. It includes such items as uncollected taxes and tax deeds, most of which are of doubtful value; and fixed city property, the true value of which nobody knows. It should be noted that the next to the last item, namely, “unexpended balances, \$8,453.30” really means unexpended balance of the building fund of the new high school, and the correct amount will be less than \$7,000, when the building committee makes its final report.

The statement is as follows:

FINANCIAL STATEMENT

Municipal Assets

Cash on hand	\$ 12,262.35
Petty cash	500.00
Accounts receivable (State)	10,847.76
Accounts receivable (others)	9,950.74
Accounts receivable (water)	9,909.94
Accounts receivable (jobbing)	742.78
City property (movable)	396,835.47
City property (fixed)	2,501,602.58
Uncollected Taxes 1914-1930	113,800.34
Uncollected taxes 1931	23,612.54

CITY OF LEWISTON

Uncollected tax deeds	65,627.85
Stock, L. & A. R. R.	225,000.00
Trust fund deposit	450.00

\$3,371,142.34

Municipal Liabilities

Municipal bond 4% serial water	130,000.00

THE PROBLEM

In 1928 our tax rate was 30½ mills; in 1929, 32 mills; in 1930, 33½ mills; in 1931, 34 mills. The steady rise has alarmed many of our taxpayers. They have held public meetings of protest. We may well give heed to their protests. Our problem is to prevent further increase, to reduce the rate if possible, and yet comply with the onerous burdens imposed upon us by law.

THE ANSWER

The solution is simple. We must practise rigorous economy. The people of Lewiston have been asked, in these hard times of unemployment and bitter suffering, to give till it hurts. They have responded nobly. It makes one proud to be the fellow-citizen of such a people. Now they must be asked by

this administration to give up, temporarily, their wishes for this or that new construction, this or that improvement. The Water Board must be urged to economize in every way compatible with the public health and safety and to turn into the treasury as much revenue as possible. Other departments must likewise economize. The city has no control of the police department; but we may hope that they realize that they also are citizens of Lewiston and have a stake in its welfare, and will help cheerfully.

When taxpayers talk of reducing the tax rate as though it was a simple matter of cutting salaries, or of merely giving the departments three fourths,—or some other fraction,—of what they ask for, they have not given the matter due consideration. There are certain fixed charges, or obligations, imposed upon the city by law.

For instances, out of our present tax rate of 34 mills, $7\frac{1}{2}$ mills must be paid to the State and about 2 mills to the County. That leaves only 25 mills for the city. Out of this we are required to pay towards reduction of the public debt, all of which, except the temporary loan negotiated by the past administration, is now in the form of serial bonds, —about \$60,000, and annual interest of about \$70,000, which take approximately 4 mills. In addition, we have built a new high school. We are proud of it; but we must remember that in return for the pleasure of having one of the finest school buildings in the State we have saddled ourselves with an annual fixed charge of approximately \$53,000, made up of the cost of ten more teachers, three more janitors, three cleaning women, fuel, lights, insurance, and annual payments on the principal and interest of the loan, in all the equivalent of $1\frac{1}{2}$ mills. After the payment of these fixed charges we are left with less than 20 mills on which to run all the other municipal activities.

We are required by law, and bound by the dictates of humanity, to support the poor. We are required to educate our youth, to provide police and fire protection, to maintain our streets, and to care for the public health.

WHERE WE CAN SAVE

By suspending all new construction of streets, walks and bridges we can save, based upon the average of recent years, about \$70,000. By doing only such sewer construction as the public health requires we can save, based upon the average of recent years, about \$20,000. By reducing to the minimum all

extra-municipal activities, and with the help of the salary reductions, we ought to save about \$12,000. Total \$102,000, or 3 mills of tax rate.

However, we shall inherit from the past municipal year a deficit of about \$125,000, which more than wipes out our proposed saving. It would seem wise, since the city has a constitutional borrowing capacity left of about \$75,000, to carry about \$75,000 of the deficit into permanent loan, getting the consent of the legislature if necessary, and to pay the balance out of this year's revenues. The result ought to leave us a net saving of \$50,000. Thereby we ought to be able at least to peg the tax rate, and possibly reduce it.

Whether we peg it or reduce it will depend principally upon how long the present hard times continue. Our heaviest drain will be support of poor. A more efficient system than the present must be devised; a better checking up on applicants for aid, and closer cooperation with the charitable societies for exchange of information.

The city is deeply indebted to the Citizens Committee for Relief of Unemployed. This opportunity should be taken to give them public thanks for their unselfish and patriotic work. It would be invidious to mention names and therefore it must suffice to say that the people of Lewiston are grateful to them, collectively and individually, and to all who are contributing to the work from their earnings.

Gentlemen of the Council, we must always bear in mind, as public servants, that every citizen has the right to criticize our acts. We should welcome constructive criticism. We shall be constantly under the watchful eyes of the newspapers. We have a right, however, to ask the gentlemen of the press that they first make sure that they have the facts right before they publish something which may injure the reputation of innocent men. The people of Lewiston will give credit for honest endeavour and they will forgive honest mistakes, but they never forgive insincerity or cowardice. With faith in the future of Lewiston and confidence in our ability to execute the trust which the electorate has so generously conferred upon us, let us now dedicate ourselves to the service of Lewiston.

HENRY N. PARADIS,

Mayor.

Lewiston, March 21, 1932.

Report of the Trustees of the Lewiston Public Library

Lewiston, Maine, March 7, 1932.

To His Honor, the Mayor and Members of the
City Council.

Gentlemen:

Having been elected to succeed the late Hon. François X. Belleau as President of the Board of Trustees, it becomes my duty to make the annual report of the condition and management of the Lewiston Public Library.

Resolutions of love and esteem were adopted by the Board of Trustees in memory of the late President of the Board, and a copy sent to his family.

The Librarian's report shows that the circulation has increased to such an extent that additional assistance is needed to keep up the efficiency of the public library.

The Trustees realize the excellent work of our progressive librarian and her active and interested staff. We feel sure that their work is appreciated by the citizens of Lewiston.

The Trustees have voted their thanks to the donors of the valuable gifts to the Library listed in the report of the Librarian.

The Librarian's report which is herewith presented gives important record of our library.

Respectfully submitted,

A. L. TALBOT,
President of the Board.

FLORENCE L. JUDKINS
L. RAOUL LAFOND
GEORGE A. RIVARD

A. M. GARCELON
HAROLD N. SKELTON,
Ex-Officio.

Report of the Lewiston Public Library

March 1, 1932.

To the Trustees of the Lewiston Public Library.

I have the honor to submit the twenty-ninth annual report of the Lewiston Public Library which is for the fiscal year ending February 29, 1932.

That the Library is gaining recognition as a useful institution in the community is shown by the steady increase in circulation over a period of ten years as the number of books lent to the public this year, 123,144, is more than double the number taken from the library in the year ending February 1922, which was 57,160. The number of volumes added to the library 2643 is also greater than ten years ago when the number was 958 resulting in additional labor in their preparation for the use of the public. Notwithstanding this increase in the work, only one assistant has been added to the staff in that period making but four people on full time with assistance of two High School girls to administer this busy library. In comparing our resources with other libraries, our appropriation is small and not augmented by large endowments as are Portland and Bangor. Our staff compares disadvantageously with twenty-two on the Portland pay-roll and fourteen in Bangor. So even in this time of depression, or perhaps because of it, we should have another assistant added to our working force.

Accessions

The number of volumes added to the library 2643 includes 504 gifts, books purchased from the State Stipend of \$500 the Kate Jackson Anthony Fund, Rental Library receipts, City Appropriation and money taken for fines for overdue books. Among the important additions to the reference collection are the Encyclopedia Britannica, 14th Edition, Cram's Modern Atlas and the Maine Histories of the towns of Dresden and York. 207 volumes in the French language have been purchased which include a valuable work on modern decoration and furnishings in five volumes and many interesting books of non-fiction.

Rental Library

The Rental collection has continued popular and remunerative as is shown by the receipts of \$465.73. From this money besides new fiction, we have purchased the valuable set "Chronicles of America" in 26 volumes and "Currier and Ives" a manual for collectors.

Gifts

Among the books received as gifts, which numbered 504 were many of interest and value. Mr. and Mrs. James Palmer gave eighty volumes of books for girls in memory of their daughter Virginia Palmer and Mrs. David Gottesfeld gave sixty books for boys in memory of her son Malvin Gottesfeld. It is desirable to preserve in the library any books, papers or pictures relating to the early history of Lewiston so we were glad to receive three copies of the Lewiston Directory for the years 1860 and 1864 from Mrs. Ezra White, Miss Bradford and Miss Florence Osborne. Mr. and Mrs. Joseph Gallant gave 36 volumes of modern fiction and books of general literature. Mrs. Grace L. Dow presented sets of the works of Edward Gibbon, George Eliot and William H. Prescott handsomely bound in leather. Mr. John C. Anderson gave 167 volumes, a collection of books on religious and historical subjects, many of which have a special value because of being out of print. The Manufacturers and Mechanics Library Association whose books formed the nucleus of the present Public Library, contributed as their annual gift seventy dollars from which were purchased fourteen volumes of the D. A. R. Lineage Books and two volumes of the Province and Court Records of Maine. The Daughters of the American Revolution, the society which was instrumental in obtaining the gift of the library from Andrew Carnegie have paid for the binding of their Lineage Books. Dr. G. P. Emmons gave 38 volumes of the National Geographic Magazine (1912-1930) which will be bound to assure the continuance of this beautiful and valuable periodical for home use. Mr. Daniel Day has also given a second set of the National Geographic 34 volumes (1907-1927). Reverend John E. Kealy paid for a subscription of one year to the United State Daily for the

library. Miss Louise Phillips gave 63 mounted foreign photographs. Mr. Charles Thomas contributed five dollars to pay for a book on antiques.

Kate Jackson Anthony Memorial Fund

The first income from the memorial fund established in 1930 by Dr. Alfred Anthony in memory of his sister, Miss Kate Jackson Anthony was received during the year. Nine volumes of exceptional beauty and value of books on subjects pertaining to nature were purchased. This is the beginning of an important collection of books which will perpetuate the memory of a woman beloved by all who knew her and extend into the future her lifelong interest in gardens and birds and flowers.

Schools and Children

Over four hundred books were sent to the schools and assistance has been given to pupils from the High Schools and the grades in reference work. Special purchases of material for the benefit of the High School debating team have been made. The circulation of juvenile books was 24,097, a gain of 2,230 over last year. Attractive bulletin boards, changed to observe events and seasons, have added to the interest of the Children's Room. Two openings when generous supplies of new books for boys and girls were placed in circulation occurred in June for vacation reading and in November for National Book Week. The librarian has visited the schools during the year inviting teachers and pupils to use the facilities of the library.

Publicity

The Lewiston Daily Sun and the Lewiston Evening Journal have given space for all library lists and notices of items of interest. Only one issue of the Semi-Annual Bulletin has been published because of lack of time and money. During Book Week in November Mr. A. Singer, owner of a store on Ash Street gave the use of the window for a week for an exhibit, of new books which attracted favorable attention. The librarian has given several book talks which advertised the new publications.

Building and Grounds

Few repairs have been made on the building this year. There is need of new lights in the delivery room and the floors of the reading rooms should have covering or re-finishing. Wilfred Breault, the janitor has improved the lawn and the garden was beautiful last summer.

Library Meetings

Miss Flint and Miss Rivard attended the Library Institute of Instruction held by the Maine State Library at Kennebunk in April. In June Miss Barr and Miss Rivard went to New Haven for the annual conference of the American Library Association and in September attended the meeting of the Maine Library Association at Kittery.

In Memoriam

In April occurred the death of Hon. F. X. Belleau who had been a trustee of the Library since its opening in 1903 and since 1920 had served as President of the Board. It is with profound sorrow that we make this record. Mr. Belleau was a true friend of the library always ready to give attention to its needs and wise in council for its welfare.

Staff

The staff consists of Miss Irma Belleau, Miss Lucy Flint and Miss Therese Rivard with Miss Mary Leger and Miss Dorothy Rawstrom as High School assistants. I commend most heartily their interest and devotion to the library.

I thank the Trustees for their kindness to me personally and for their attention in details of management of the library.

Respectfully submitted,

ANNIE L. BARR

Librarian

Report of Fire Commissioner

Lewiston, Maine, March 1, 1932

To the Honorable Mayor and Members of the City Council.

Gentlemen:

I herewith submit the yearly report of the activities of the Fire Department for the municipal year just ended. As in previous reports I shall not attempt to include the tabulation of the individual fires, losses or insurance carried on the property that was damaged or destroyed by fire. To all parties interested and seeking such information, the officials of this department shall be glad to furnish same from the complete records kept on file at headquarters.

During the past year the department responded to 590 calls, classified as follows:

Telephone calls	455	
Box alarms	58	
Still alarms	25	
Sprinkler alarms	10	
Chief calls	6	
Other than fire calls:		
Life saving, cats up trees, helping people, etc.	24	
Out of city calls	4	
Department code calls	8	
Total number of calls		590

The four out of city calls listed above were as follows:

Welchville	1
Leeds	1
Greene	2

By Department Code Calls is meant the calling of extra apparatus from our own stations and for extra help from Auburn.

Of the twenty-four calls listed under "other than fire calls", five were for life saving.

Forty-two of the above calls were false or unnecessary.

Of the actual 463 fires, 458 were confined to the building or place of origin, and only five extended to adjoining buildings; 24 fires were in brick or stone buildings; two in an iron-clad building; 240 in wooden or frame buildings; one in a concrete block building and 196 in other than building fires, such as, dump, grass and forest fires. The fact that the department confined almost all of the fires to the place of origin speaks very well for the efficiency of our department.

The fire losses for the 1931 period represent a per capita loss of \$3.10. This figure is somewhat higher than last year, due to the fact that there was an increase in the number of fires in our mercantile district. A few fires in this district always result in much larger losses than in the residential district on account of the nature of stock and fixtures that are found in business establishments.

For comparison and for your information the following figures will show the per capita loss for the past six years:

1931	\$3.10	1928	\$2.03
1930	2.43	1927	3.80
1929	4.35	1926	2.15

The following is an exact copy of the report as sent to the National Board of Fire Underwriters for the year 1931:

Total value of property involved in fires	\$1,302,875.00
Total insurance carried thereon	819,740.00
Total insurance loss	97,203.81
Total insured and uninsured	111,904.29
Direct losses	109,798.79
Exposure losses	2,105.50

Inspection

The same policy of fire prevention and inspection heretofore adopted have been carried out. Permanent men from this department inspect every building in the business district once a month and in the residential district once in every two years.

Apparatus in Service

Our motorized apparatus is in very good condition. All pumping engines have been tested and the apparatus overhauled.

Apparatus of the department in service consists of the following:

- One Mack Aerial Ladder: tractor-drawn truck, equipped with a full complement of ground ladders and the latest fire fighting tools, including a stationary large size ladder pipe for fighting fires at high altitudes, thus using this truck as a water tower. This apparatus was purchased in December, 1929.
- One American Lafrance City Service Truck: equipped with ladders and other tools such as plaster hooks, salvage covers, brooms, cellar of loft pipe, deluge set, etc. This apparatus was purchased in 1925.
- One American Lafrance Triple Combination: Carrying 1250 feet of 2½ inch fire hose, 40 gallons chemical tank and has a pumping capacity of 750 gallons of water per minute. This apparatus was purchased in 1924.
- One American Lafrance Triple Combination: type 65, has a pumping capacity of 400 gallons of water per minute, is equipped with a booster tank, carries 1000 feet of 2½ inch fire hose. This apparatus was purchased in 1926.
- One Maxim Triple Combination: type BU 1, has a pumping capacity of 400 gallons of water per minute, carries 1300 feet of fire hose and tools including a booster tank. This apparatus was purchased in 1925.
- One Chief's automobile: Buick, purchased in 1931, carries a foam generator and two cans of foam powder.
- One horse-drawn hose wagon: carries 1500 feet of 2½ inch fire hose, is hauled to fires by a pair of horses owned by the department. I desire to call your attention to what I have to say in regard to this apparatus in my recommendations.

Apparatus in Reserve

All of our reserve apparatus is mostly antiquated and is of very little use to this department, excepting the item of fire hose in reserve.

One horse-drawn hose wagon loaded with 1500 feet of fire hose is used only in emergencies and only within a reasonable distance of the fire stations. Another hose wagon is kept unloaded and is used for the department trucking.

One Amoskeag Steam Fire Engine, horse-drawn, was tested sometime ago and was found able to deliver only about one-half of its capacity. In order to repair this old piece of apparatus and place it in first class condition, so that it would deliver its full capacity of 800 gallons of water per minute, it would mean quite an expense and would certainly be a waste of money as this old engine is only used to relieve the motorized pumping engines.

Personnel

Permanent Force

The following is the number of men for each grade as indicated:

Commissioner
Chief Engineer

Deputy Chief Engineer
Fire Surgeon

Supt. Fire Alarms

Engine Company No. 1

One Captain
One Lieutenant
Four Privates
Twelve call men

Engine Company No. 2

One Captain
One Lieutenant
Four Privates
Twelve call men

Engine Company No. 5

One Captain
One Lieutenant
Two Privates

Ladder Companies:

Aerial and City Service:

One Captain
One Lieutenant
Four Privates
Twelve call men

Hose Company No. 1

One Lieutenant
Two Privates

* NOTE:—Of the sixteen Privates, fourteen are first class with three or more years of service, one is second class with two years service and one is third class with one year's service.

Additional Call Men: One Asst. Supt. of Fire Alarm
 One Asst. Engineer (reserve)
 One House man

Pensions

We have five men at the present time who are receiving pensions from this department:

	Yearly Pension
Ex-Captain John R. Maliar	\$120.00
Ex-Driver Herbert Sirois	267.80
Ex-Deputy Chief P. J. Cronin	275.00
Ex-Assistant Engineer J. J. Cronin	225.00
Ex-Assistant Engineer N. Bazinet	225.00

Deaths

The deaths of Captain Michael Holmes of Hose Company No. 1 occurred at his home, July 28, 1931, and of Engineer J. B. Longley of Steam Fire Engine No. 3 at his home on January 5, 1931. These deceased members were the two oldest members of the Lewiston Fire Department and were especially faithful to the duties entrusted to them. The sympathy of this entire department goes out to the families of these two beloved comrades.

Life Saving First Aid

Five calls were to respond for life saving by our trained operators under the supervision of the Fire Surgeon.

It is noteworthy to state that all our operators assigned to this important duty of life saving are all the younger members of the department. They are trained under competent instructors and practice for forty-five minutes every Wednesday afternoon.

Stations

The department owns and operates three fire stations situated as follows:

Central Fire Station (Headquarters). This is a brick building at the corner of Bates and Ash Streets, and houses Engine No. 1, Engine No. 2, Aerial Ladder No. 1, City Service Ladder Truck, Chief's Car, an old steam engine and the Fire Alarm System.

Park Street Station: This is a brick building and houses Hose Wagon No. 1, and spare Hose Wagon and horses.

Lincoln Street Station. This is a wooden building and houses Engine No. 5.

Note: The Barkerville Station was demolished during the year 1931.

Improvements

On account of the small amount appropriated for the repairs of buildings, only the most urgent and necessary repairs were attempted during the year.

A new one-pipe hot-air furnace was purchased and installed in the Lincoln Street Station. This station was badly in need of repairs and painting. During the year it was thoroughly overhauled; supporting beams renewed; the horse stall and shed in the rear of the station was made into a work room; a new piazza was built thereby replacing an unsightly entrance, and a new roof of slow-burning composition material was put on in place of the old singled roof that leaked in many places. It was also given two coats of paint, inside and outside, eight new windows and curtains were installed, and new bed spreads purchased. With these repairs and improvements this station is now in perfect condition, making it a very pleasant and comfortable place for our firemen to occupy. I do not think it will be necessary to make further repairs to this station other than a periodical painting.

The department purchased from the Lewiston Buick Company a new Chief's car for official use of the executives of the department. This was purchased at the price of \$1640.00, for which the City Council appropriated \$1500.00. This new car was badly needed as the old Studebaker was six years old and had become dangerous to use for fire duty.

In view of the fact of the increasing hazards and possibilities of serious oil fires an American Lafrance

Foamite Generator and two tons of foam powder were purchased and placed in service. With this new machine we can now cope with any oil fire. In this respect the department was badly handicapped through the lack of this most important fire fighting appliance. If this department had experienced an oil fire of any size before the purchase of this foam generator, there is doubt if it could have been extinguished without calling on the Portland Department for the loan of such an appliance. The distance between Portland and Lewiston is such that any such fire very easily could have been disastrous before we received assistance.

The chimney at the Park Street Station was repaired and placed in a safe condition.

The front wall of the Central Station was pointed and cemented because water came down the wall, seeped through, and damaged the interior of the building.

Approximately 10,000 feet of twin lead cable was purchased and installed underground in the telephone ducts. The placing of our fire alarm wires underground, wherever possible, is of the utmost importance. The National Board of Fire Underwriters recommend and require that all fire alarm wires be so placed, in order to overcome interruption of service in case of severe wind storms, sleet storms and the danger of overhead wires falling on the fire alarm wires. In a couple of years, provided we have sufficient funds to carry on this work, it is hoped to complete the placing of all of the fire alarm wires underground, wherever there are telephone ducts.

Three new fire alarm boxes of the latest type were purchased and installed to replace old boxes that had become too old for reliable service.

Changes

In order to eliminate the possibility of politics entering into the appointment of candidates for this department, I have appointed a board of three prominent men, which shall be known as the Civil Service Commission. They will examine all applicants for appointment as Call Firemen, and rate them accordingly. This Board is composed of Messrs. R. R. N. Gould, John J. Butler, and A. D. Provencher.

After a thorough study of the conditions of the department and the personnel of the organization, I have abolished all officers' berths, or rank, in the Call Force, thus promoting efficiency by avoiding duplication of orders and division of responsibility. I have placed the Call Deputy Chief, who hitherto has been attached to the Call Force, also the two Assistant Engineers on the pension roll. These three men have served for over thirty years in the department. The Call Captains and Lieutenants were returned to duty as Privates. To replace these officers I have appointed Captain Reuben Estes of the permanent force to the grade of permanent Deputy Chief Engineer, as I believe this important position should be filled from the permanent force.

To make the above change possible it became necessary to appoint one permanent man to fill the vacancy created by the promotion of Deputy Chief Engineer Estes, and I appointed Private Frank Edgecomb to the permanent force.

All call men were attached to either engine or ladder truck companies for duty, commanded by the permanent officers.

Because of the small salary paid the permanent firemen, I believe it only right and reasonable for the City of Lewiston to purchase for the firemen the rubber equipment worn in fighting fires; therefore, I have issued instructions and orders that hereafter all such equipment shall be purchased by the department, and paid for by the department.

By eliminating the Board of Engineers, composed of the Call Deputy Chief and the two Assistant Engineers, we were deprived of the personnel composing the board of Fire Escape Inspectors that by statute we must maintain. I have, therefore, appointed the following permanent Fire Escape Inspectors: the Chief Engineer and the Deputy Chief Engineer.

Recommendations

It is my desire to make only such recommendations as are absolutely necessary for the efficiency of the department, and with this idea in mind, I respectfully ask The Honorable Mayor and Members of the City Council

to give their serious consideration to the following recommendations:

First and foremost, I will state that at the present time we have thirty (30) fire alarm boxes on our fire alarm circuits that are of the oldest type and are unreliable. As the fire department is dependent upon the prompt transmission of alarms it is inviting serious trouble if we leave these old boxes on the system any longer. I do not wish to be an alarmist, but I can state that in the past some of these boxes were pulled for alarms of fire and either did not work at all or sent in a jumbled-up signal that only confused the men. Fortunately, however, when these boxes failed to work properly the fires were of minor consequence.

I recommend that thirty new fire alarm boxes of the latest type be purchased and installed to supplant the thirty unreliable ones. The Gamewell Company has volunteered to install these for us, billing them to us over a three-year period; that is, one-third to be paid each year, and besides, will allow us \$12.00 each for the thirty old boxes as a trade-in value.

Our fire alarm system is a little old fashioned as our alarms still come into the different stations and into the homes of the members of the department on the so-called "slow time". Much valuable time could be gained in speeding up the system by the installation of apparatus whereby the transmission of an alarm could be received at the fire alarm headquarters. In this way, the fire apparatus would be on its way before the fire whistle started blowing or the City Hall bell started ringing.

The so-called "slow time quick time" transmitter should be purchased and installed on our fire alarm system, thereby speeding up our service and placing our system on a modern basis.

I recommend that cable of the twin wire type, lead covered, be purchased and installed, in keeping with the Underwriters' requirements, thereby hurrying the completion of placing our fire alarm wires underground, which is about one-half completed at the present time.

That a booster tank, of at least 80 gallon capacity be purchased and installed on Engine No. 1, to replace the present large sized chemical tank. In doing this, it would make this piece of apparatus modern. With

the present chemical tank we spoil a large amount of fire hose through spilling of the sulphuric acid used in this tank. It is expensive to recharge and must be completely emptied if once dumped. With a booster tank connected to the pump-suction chamber any part of the contents of the tank can be used, and costs nothing because only water is used. The saving in fire hose and chemicals would pay for the new tank in a short time.

That two additional permanent men be appointed to the force. According to the Underwriters' requirements our man power is below what is considered the average for the proper number of men supposed to be on duty to man our apparatus.

That fourteen more red lights be purchased and installed on the like number of poles to show the location of the fire alarm boxes after dark. With these, all the alarm boxes in the city will be so marked.

That the pair of horses owned by the department and used to haul a hose wagon to fires be sold and replaced by a triple combination of at least 750 or 1000 gallons per minute, as recommended by Underwriters. I repeat, it is a waste of money to keep these horses in service any longer. They are costing the City for upkeep, including shoeing, board, repairs to stalls, floors, etc. approximately \$1200 00 per year. They are useless to this department, but must be maintained in service in order to maintain our present insurance rate. These are used in the immediate vicinity of the Park Street Station, usually on second-alarms. Three men are kept on duty at all times to care and drive these horses. Salaries paid these three men amount to \$4,850.00 per year. These men could be used to very good advantage on a motorized piece of apparatus.

I also recommend the erection of three sub-fire stations on the outskirts of the City, as follows:

Upper Main Street, Fair Grounds area;

Sabattus Street, Mitchell Hill area;

Lower Lisbon Street, Rosedale Street area.

That some ordinance be passed to control the handling, sale and storage of inflammable liquids.

That a small truck be purchased to haul hose back from fires, do all the trucking for the department, and

to transport men to forest, dump and grass fires. This truck could be used as a hose carrier in emergencies, as a Foamite carrier for gasoline and oil fires, and could be purchased for approximately \$1200.00.

That a new circuit be installed and the necessary equipment be purchased for the three stations so that all telephone calls be confined over the fire alarm system, without sounding the fire alarm whistle or City Hall bell.

That a time stamp be purchased for recording the official time for all fire alarms.

That insurance of a blanket type be carried on all the members of the department so that they can receive their pay in case of accidents, and so that their families may collect in case of death while in line of duty.

In conclusion, I extend my most sincere thanks to The Honorable Mayor and the Members of the City Council for their hearty cooperation and the interest they have taken in the welfare of this department; to the officers, members and employees of the Police, Water, Highway, and other Public Departments for the valuable services they have rendered; to the Sun-Journal, Le Messenger, the School authorities and the Clergy for their cooperation, especially during Fire Prevention Week, and to all others who have volunteered their services or assisted our department in any way.

To the members of this department I extend my sincere thanks for the efficient and faithful manner in which they have performed their duties.

Dr. JOSEPH W. SCANNEL,

Fire Commissioner

Report of the Police Department

Fiscal Year Ending February 29, 1932

To the Police Commissioners:

Gentlemen:

I am herewith submitting report of the police department for the past year, together with recommendations for the coming year.

Traffic

The use of traffic control lights in our congested areas has continued to render vast service to our motoring public, as well as to pedestrians. The extensive use of them in the many cities has made them a standard universal equipment, whereby, motorists both transient and local expect to be governed by the red and green lights. There are still some intersections where I would suggest lights be placed, such as College and Sabattus Streets; Lisbon and Birch Streets, and Cedar and Lincoln Streets.

The "traffic tower" at junction of Main and Lisbon Streets should be removed and a modern type of traffic control lights installed at this intersection. Two plans for controlling this area are on file in this office.

The "parking space" in center of Main Street at Union Square has served its purpose, but the time has come when I believe it should be abolished. It accommodates eighteen automobiles and takes up a section of the roadway that is needed for traffic. It is a hazard, as the automobiles when leaving the parking space, either back or go forward into an almost steady stream of traffic. Traffic going into or out of Park Street, between the two sections of the parking space, is hindered and jammed many times because of the fact that parked autos occupy this space.

"Stop" signs also are very useful and I wish to suggest a more general use of these signs, particularly, those of the "reflector button" type which show up well in the rays of automobiles headlights at night.

Police Signal System

The system is functioning properly and caring for our requirements. However, I believe that such wiring as it is possible to put underground, should be re-laid when funds are available. A little done each year would, in a few years, place a good percentage of our wires in conduits where the chances of damage to wires and system will be greatly lessened.

Short Wave Radio

Rumors are persistent that the State contemplates erecting a broadcasting station or stations for police work, and yet while I don't think the expense would warrant the City of Lewiston in erecting and maintaining its own station, I believe it would be a big step forward if some arrangement with the State could be made whereby this department could avail itself of the opportunities that short wave radio can give. Receiving sets for Headquarters, automobiles and motorcycles should not be exorbitant, and with a privilege of having our own matters broadcast, it would provide a valuable means of transmitting police information.

Motor Equipment

The Ford Sedan is in good condition, and with the exception of new tires and minor repairs, should give good service the coming year.

The Nash and Hupmobile Sedans are both in good shape and there is apparently nothing to be done to these cars.

The motorcycle is undergoing a factory repair job, including painting. It should be in first class condition to put onto the road.

The Paige patrol should, with the proposed repairs, be in as good condition as can be expected of a car that has done service since 1924.

Lost and Stolen Property

Properties to the amount of \$9,797.01 have been recovered and returned to the owners.

To the Police Commissioners and all other citizens of Lewiston who have aided me during the past year I wish to express my sincere gratitude.

Respectfully submitted,

JOHN H. ASHTON

Chief of Police

Report of the Police Matron

February 29, 1932

To the Police Commissioners:
Gentlemen:

I herewith submit my annual report as Police Matron of this city.

I have attended court each morning, personally caring for women prisoners from time of arrest till their case is disposed of. Such duties consist of searching the prisoner; looking after her needs and comfort while in custody; appearing with her in Municipal Court during her arraignment and accompanying her to such institution as the Judge might order.

I have investigated complaints; gathered evidence in criminal matters; assisted in raids and made arrests when women were implicated.

I have especially interested myself in matters pertaining to juveniles, realizing that by advice and assistance, they might be saved from having a criminal record.

I have visited dance halls regularly, also restaurants, theatres and depots observing the conduct of women and viewing conditions in the ladies' rooms.

I have done police work at the Maine State Fair Grounds, Circuses, Carnivals and in the stores during the holiday seasons.

I have cared for lost children when brought to headquarters, also reported those children of school age whom I have seen on the streets or in their homes during school hours.

I have assisted many girls who were expectant mothers, sometimes arranging for confinement, finding homes for illegitimate babies and aiding the mother to re-establish herself.

I wish to express my deep appreciation to the Police Commissioners, Chief, Captains, Officers, Mayor and City Government for the support accorded me as Police Matron.

Respectfully,

IRMA MICHAUD,
Police Matron.

Report of the Inspector of Buildings

To the Honorable Mayor and Gentlemen of the Board of Aldermen:

I hereby submit my report as inspector of buildings for March 1st, 1931 to March 1st, 1932

Estimated cost of buildings for the year, \$448,032.00

Number of new tenements, 50.

The above buildings have been properly inspected and found to comply with the provisions of chapter 23 of the revised statutes of Maine and building code. All directions given by the inspector of buildings to the owners and contractors have been complied with.

Respectfully yours,

LAURENCE A. MURPHY

Inspector of Buildings

Report of the Superintendent of City Farm

Lewiston, Maine, March 17, 1932.

To the Honorable Mayor and Members
of the Board of Aldermen:

I respectfully submit to you my sixth annual report
as Superintendent of the Lewiston City Farm for the
year ending February 29, 1932.

The following is the list of stock on hand:

11 Cows

1 2½ year old Holstein Bull

2 one year old bull

4 one year old heifers

1 2½ year old heifers

2 spring calves

5 horses

100 hens

165 pigs

Received from the Sale of Produce	\$3581.76
Received from the State of Maine	1357.88
Received from the Town of Eustis	617.30
Amount due from State	765.77

Total amount received	\$ 6,322.71
Total amount appropriated	10,000.00

Grand total received	\$16,322.71
Total amount expended during the Municipal year for coal and wood, clothing, groceries, tobacco, repairs, drugs, care of inmates	\$17,157.88
Total amount received	16,322.71

Overdrawn	\$ 835.17
-----------	-----------

During the year a new boiler was purchased to re-
place the old one.

The old Dodge touring car was exchanged for a
new one.

A five (5) year old horse was bought for the Garb-
age Wagon.

A 20x50 new piggery was built to house more pigs
during the winter months.

The Vegetable Building was boarded up inside, and minor repairs were done where they were most needed.

A new dormitory for men was opened in the west wing of the wooden building. Fourteen (14) new beds were installed; then plumbing had to be done to provide heat in that room for the inmates; and all this improvement cost a lot of money.

We have had an average of 85 inmates this year, the lowest 78 and the highest 99, and it is too many for them to be comfortable. Years ago when they had 35 or 40 inmates it was allright, but now they are overcrowded, and I believe that something should be done. The building is too small. In the summer time the inmates spend their time out of doors, but in the winter time they have got to have room inside large enough to make them comfortable.

I would recommend that the north wing of the wooden building be repaired, and built an addition for a smoking room. As it is now, the wash room and the smoking room are the same, and on washin^g day the inmates have got to stay in that room, or pack themselves in the corridors.

In closing I want to thank the Mayor, and the Board of Aldermen for their assistance and help during the past year.

Respectfully submitted,

ANTOINE LANDRY,

Supt. of Lewiston City Farm.

J. O. BELANGER, Clerk
Overseer of Poor.

Report of Supt. of Lighting Plant

Lewiston, Maine,
March 12, 1932.

To the Honorable Board of Mayor and Aldermen:

I hereby submit my report as Superintendent of the Municipal Lighting Plant for the year ending February 29, 1932.

We rewired the Pumping Station. Both Water Works and Lighting Plant including all new fixtures.

Repairing of Water Wheel and installing new set of teeth in Bevel Gear.

We installed 12 new street lights.

Respectfully submitted,

ALFRED LAJOIE, Supt.

Report of the Highway Commission

Lewiston, March 1, 1932

Gentlemen: The following report of the Lewiston Highway Commission is respectfully submitted for the year ending February 29, 1932.

The following is the personnel of the Board.

Chairman: Harold N. Skelton, Ex-Officio

Members: Harry Stetson Emerilde Beliveau

Alfred Malo, Superintendent C. J. Cronin, Assistant

Albert G. Foss, Clerk George J. Maher, Assistant

The following recommendations are submitted for the coming year.

The following streets have been proposed and designated by the State Highway Commission as State Aid Roads.

Wood St. from Campus Avenue to Sabattus Street	8228 sq. yds.
Horton St. from Sabattus St. to Birch St.	8566 sq. yds.
Walnut St., from Howe St. to Webster Road, 3rd. class State Aid road,	7108 sq. yds.

Sewers

We would recommend the completion of the Jepson brook sewer and would ask for an appropriation of \$10,000.00 (ten thousand dollars) for that purpose.

We would say that the department has already expended about \$5,000.00 (five thousand dollars) for the work of the unemployed and this department must provide for sewer extension and the cleaning of catch basins and repairing of the same during the coming year.

For a more detailed report of the work done the past year we would refer to the report of the Superintendent.

Respectfully submitted,

A. G. FOSS, Clerk.

Report of the Superintendent of Streets

Lewiston, March 1, 1932

To the Honorable Board of Highway Commissioners.

Gentlemen: I herewith most respectfully submit my annual report as Superintendent of this department for the year ending February 29, 1932.

The following permanent work has been done the past year:

Permanent Streets

Bituminous macadam was laid as follows:

On Holland street,	1,700 sq. yds
Union street,	1,700 sq. yds.
Whipple street,	1,600 sq. yds.
Park street,	1,039 sq. yds.
Bartlett street,	1,060 sq. yds.
Lisbon road (recoated),	1,700 sq. yds.
Lisbon road (new),	850 sq. yds.
Lowell street,	2,800 sq. yds.
	<hr/>
	12,449 sq. yds.

Cut Block Pavings

On Park st. from Main to Chestnut St.	6,632 sq. yds.
Middle st. from Main st. to M.C.R.R.	3,457 sq. yds.
Chapel st. from Main to Lowell St.,	2,015 sq. yds.
	<hr/>
	12,104 sq. yds.

Gravel Roads

3,200 feet of gravel road was constructed on the Webster Road (3rd. class). 5 miles of gravel road was laid on the various roads (new), and 4 miles of gravel road was recoated.

Sprinkling

81,430 gallons of tarvia was spread on the several gravel roads.

Bridges

Riverside St. Bridge was thoroughly overhauled and painted. Bridge St. Bridge was replanked and painted.

Both bridges were coated with macadam. All the other bridges in the City and rural sections are in good condition.

Sewers

900 feet of 42 in. segment block pipe were laid on the Jepson Brook sewer and four manholes built.

750 feet of 10 in. pipe were laid on the Lisbon Road and one manhole and two catch basins built.

250 feet of 12 in. pipe were laid on Birch St. and one manhole built.

325 feet of 10 in. pipe were laid on Googin St.

850 feet of 10 in pipe were laid on Bardwell St.

250 feet of 12 in. pipe were laid on Park St.

34 catch basins were built in different parts of the City and a large number repaired.

Permanent Walks

4930 sq. yds of cement walk were laid in various parts of the City.

577 sq. yds. of tar concrete walk were laid and 121 sq. yds. were recoated.

1200 sq. yds of brick walk were relaid.

8349 feet of concrete curbing were laid on the several streets.

I would recommend the following amounts for use of the department the coming year:

Highways,	\$110,000.00
Permanent streets,	20,000.00
Sewers,	28,000.00
Permanent walks	10,000.00
Bridges,	5,000.00
Sprinkling,	15,000.00

\$188,000.00

In closing this report I extend my sincere thanks to the Commission for advice and assistance given during the year

Respectfully submitted,

A. MALO, Superintendent.

Annual Report of the Health Department

FOR THE YEAR 1931

*To the Honorable Mayor and Members of the
Board of Aldermen of Lewiston, Maine.*

Gentlemen:

I have the honor to submit herewith a report of the activities of the Health Department for the year 1931.

Monthly reports of activities of this Department have been submitted and are available at any time.

During the year 1931, Mrs. Lea Beaudoin Simpson, R. N., resigned and Miss Juliette A. Giguère, R. N. was appointed as Public Health Nurse. No other change in the personnel has occurred during the year.

Contagious Diseases

The following cases of communicable diseases have been reported during the year:

Chickenpox, 56; Diphtheria, 26; Infantile Paralysis, 4; Influenza, 1; Measles, 861; (an epidemic occurred during October, November and December of 1931); Meningitis, 6; Mumps, 146; Pneumonia, all forms, 57 cases and 51 deaths reported; Scarlet Fever, 77; Tuberculosis 28 cases and 7 deaths reported; Typhoid Fever, 4; Vincent's Angina, 2; Whooping Cough, 21.

Laboratory Work

During the year 1931, 149 examinations were made in the municipal laboratory:

For Tuberculosis: 37 negative and 21 positive.

For Gonorrhoea: 69 negative and 27 positive.

Vital Statistics

Registration of births is very important, not so much as a birth has been recorded, but in years to come, this record proves citizenship, residence, legal age; establishes a right to vote, and many things so essential in one's life.

Registration of deaths: It has been said that the use of death registration is legal, economic and social. In the settlement of life insurance, property inheritance, it is invaluable. Statistics based upon these records are used in studying disease and improving the health of the community. The study and control of epidemics and outbreaks of communicable diseases are possible by these records.

I wish to thank the doctors of this community for their past cooperation and hope to be favored with their future help along this line of work.

923 Births were recorded during 1931.

596 Deaths were recorded—30 Stillbirths and 101 children died under one year.

An intensive study of the infant mortality and maternal mortality statistics is being carried on by this Department.

Plumbing Inspection

Mr. Fred G. Hayes is the Plumbing Inspector and his work consists in investigating each application filed at this office to install plumbing work, and to grant approval for each completed job which meets the required standards:

During 1931: 221 applications were filed; 293 approvals were given for work done; 735 calls were made pertaining to plumbing conditions.

Sanitary Inspection

Mr. J. Clod LeProhon is in charge of this phase of the work in the Department. His duties consist in inspecting public establishments and seeing that sanitary conditions are acquired and maintained.

During the year 1931, he made 2,916 calls including bakeries, barber shops, beauty parlors, clubs, dairies, drug stores, dumps, fairs, fire stations, fish markets, frankfort stands, fruit stores, groceries and confectioneries, hotels and lodgin^g houses, laundries, manufacturing plants, pool rooms, restaurants, print shops and various other places.

Milk Testing

In charge of Mr. A. B. Andrews . A monthly report appears in the newspapers regularly.

Mr. Andrews examines samples of milk and cream from each dealer who enters the City of Lewiston and sees that city standards are maintained in butter fat and total solids also specific gravity. Follow-up work on those who have low standards is done by this Department.

A record card for each dealer showing the report of examination of each sample taken from his wagon, during the year, is kept on file at this office.

During 1931, the Milk Regulations were revised, our endeavor being to raise the standard of our milk supply.

An ordinance about steam sterilization was drafted and submitted by the Health Officer to the City Government, where it received a unanimous approval.

I wish to thank the State Department of Agriculture for the cooperation they have extended our Department at all times.

During the year 1931, the Health Officer made 250 calls on dairies, with the State Dairy Inspector.

Pre-School and School Children Hygiene

The school work consists of inspections to detect physical defects, and follow up work in order to have defective conditions corrected.

Parents who are unable to have defects corrected due to their financial state, are urged to send their children to various clinics.

Children are taught the principles of personal hygiene through health talks.

Following is a report from the Public Health Nurse, Miss Juliette A. Giguère, R. N., from the time she assumed her duties August 17, 1931 to February 29, 1932.

No. of schools included in this report	6
No. of school buildings and grounds inspected	6
No. of pupils weighed and examined for defects	3,077
No. of pupils found defective	1,737
Classification: Defective teeth	1,371
Diseased or enlarged tonsils	452
Defective vision	163

HEALTH DEPARTMENT

47

Defective hearing	108
Enlarged glands in neck	121
Orthopedic defects	27
Speech defect	5
Skin disease	27
Underweight 10% or more	385
Overweight 5% or more	5
Other defects	163
No. of pupils excluded for symptoms of:	
Skin contagious disease	13
Scarlet Fever and Diphtheria	13
Pediculosis	2
No. of class talks and demonstrations	67
Conferences with school principals and teachers	34
No. of notices sent to parents about corrections	1,721
No. of home calls to parents about corrections	136
Conferences with parents in regards to corrections	393
Educational material distributed free in schools (Healthy Living)	1,647
Educational material distributed free in schools (Contagious Disease)	1,250
No. of patients referred to Health Officer for:	
Throat and nose defects	39
Defective vision	39
Defective hearing	5
Skin disease	63
Other medical attention	7
Corrections made possible thru the Health Department:	
Teeth	77
Vision	27
Tonsils and adenoids	12
Pupils still receiving treatment at Orthopedic clinic	2
Pupils still receiving treatment at Oculist	1
Pupils receiving other medical attention	4
Pupils who received Dental prophylactic treatment at Red Cross Rooms	268
Pupils on waiting list at Hospital for tonsils and adenoids operation	23
Pupils on waiting list for vision treatment	12
Pupils on waiting list for dental treatment	31
No. of other defects corrected by family physician and dentist:	
Teeth	182

Vision	16
Throat and nose	3
No. of vaccination clinics assisted	11
No. of patients attending	148
No. of immunization clinics assisted	7
No. of patients attending	149
No. of Schick Testing clinic assisted	1
No. of patients attending	90
No. of pupils examined for contact with contagious disease	707
No. of home calls for investigation of contagious disease	121
No. of State investigations for tuberculous patients	47
No. of home calls to tuberculous patients	57
No. of patients outfitted for sanatorium or in sanatorium	25
No. of children accompanied to physician or oculist	10
No. of children accompanied to Red Cross rooms or dentist	268
No. of dental clinics assisted (extractions)	1
No. of patients attending	23
First aid treatments given	3
No. of medical or Social Workers' Meetings attended	13

Welfare Activities

Immunization against diphtheria clinics were held at this office, several times a week during a period of several months—and 1224 children were injected.

Vaccination clinics were also held and 575 children and adults were vaccinated against smallpox—342 reported successful vaccinations, altho successful vaccinations cannot be recorded accurately, as most of the patients do not report for inspection.

Schick Tests for Diphtheria and Dick Tests for Scarlet Fever were done at local orphanages.

Calls

Infectious disease calls	1,175
Vital statistics calls	56
Nuisance calls	108
Referred to Venereal Disease Clinic	36
Health talks	22
Children examined at Office	639

Children examined in School	1,481
Children referred to Red Cross	101
Children referred to Hospitals	119
Children referred to Physicians	343
Children referred to Dentists	17

Recommendations

1. Again the Health Department would like to recommend an isolation hospital to take care of contagious diseases. The isolation hospital would be a saving of money to the City and a saving of both money and loss of school days to patients of which the majority are of school age.

We are not asking for a spacious hospital, but for quarters where it would be possible to remove patients afflicted with communicable diseases, especially patients from large families who are living in close and crowded quarters, and where it becomes necessary to exclude from school contact cases.

2. The Health Officer's car should be replaced. The car has been driven over 20,000 miles, has to be painted and overhauled.

3. Our frigidaire should be replaced. A frigidaire must be dependable for the protection of our serum. It is always out of order and repairs are costly. Serum once spoiled cannot be used, so it is of VITAL importance that the frigidaire be kept in good running order.

4. Again the Health Department would like to have the cooperation of the City Government whereby steps could be taken to have a bacteria count done on the milk supply entering into the City of Lewiston. The quality of milk can be easily found out by the number of bacteria found present in the milk.

5. A part time school physician is a most urgent need for the inspection of pupils for detection of defects, notification sent to the parents to see their family physician, and as a result preventing the loss of school days to students, and also preventing serious defects in adult life.

Successful education is so dependent upon the pupil's good health that almost any necessary degree of

school health service can be justified on this basis alone.

6. The Health Department would recommend that clothing, fuel, lodging, medical prescriptions and all expenses incurred by needy families under quarantine or on the waiting list for the sanatoriums, or in the sanatoriums, be taken care of by a **Welfare Department**.

I wish to thank the municipal officers, the different departments and members of the retiring government and citizens for their coopration and I also hope to receive the cooperation of the new government in our endeavor to make LEWISTON a "Healthy City."

Respectfully submitted,

ROBERT J. WISEMAN, Jr., M.D.

Report of the Tax Collector

Lewiston, Maine, February 29, 1932.

The Honorable Board of Mayor and Aldermen:

Gentlemen:-I most respectfully submit to you my report for the fiscal year ending February 29, 1932. I feel sure that this report will meet with your generous approval. The state of depression and unemployment that has prevailed over this City for the past year, has reflected heavily on this department. However, I am grateful for the results obtained. My object has been to help the people pay their taxes in a way most convenient to them.

Report of the Sealer of Weights and Measures

Lewiston, Maine, March 16, 1932

To the Hon. Board of Mayor and Aldermen
of the City of Lewiston.

Gentlemen:

Herewith I submit my report as Sealer of Weights and Measures for the City of Lewiston for the year ending February 29, 1932, as follows:

During the year, I have tested five hundred and forty-seven (47) scales, five hundred and eighty-one (581) weights, twenty (20) dry measures, one hundred and eleven (111) liquid measures, four (4) yard-sticks, two hundred and four (204) gas pumps, two hundred and fifty-seven (257) kerosene and oil pumps, eight (8) molasses pumps, three (3) measuregraphs, and four (4) vehicle tanks, a total of seventeen hundred and thirty-nine (1739) separate inspections. Out of this number, under the authority vested in me, I have condemned seventeen (17) scales, five (5) weights, two (2) dry measures, three (3) liquid measures, one gas pump, two (2) kerosene and oil pumps, a total of thirty (30) different measuring devices withdrawn from use. In addition to these condemnations, I have ordered approximately two hundred (200) various devices repaired, and on my orders being complied with, these items have been restored to use.

In making these inspections, I have charged the fees provided by law and accordingly have collected a total amounting to three hundred and forty-six dollars eighty-seven cents. This amount has been turned into the City Treasury as collected, monthly or oftener when a considerable sum had accrued. My accounts have been regularly audited by Mr. Tribou, the City Auditor.

By the courtesy of the Public Property Committee and of the Judge of the Municipal Court, nearly a year ago an office was provided for me in a room originally intended as an ante-room to the Judge's chamber. All equipment, formerly scattered about, has been collected in this room. The office has been very useful to the de-

partment and convenient for those persons who bring in their scales and weights for examination. The use of this office should also effect a considerable saving to the City in the course of years as the equipment is much better protected from loss or damage. In the past year, the equipment has been increased by the addition of large weights for use in testing platform scales. The office, however, is still very deficient in testing devices required by modern conditions. Whereas formerly a series of standard weights and a number of receptacles of standard capacity for dry and liquid measures met all needs, the modern demand for speed and volume coupled with a change in the nature of commodities sold, has made such equipment inadequate. This is particularly true in the case of fuel, oil. It can be readily seen that it is, for practical purposes, impossible to accurately test, with a five gallon can, the capacity of vehicle tanks holding not less than two hundred gallons in one compartment and frequently having a total capacity of fifteen hundred gallons in one truck. I respectfully recommend that the City purchase the requisite implements for checking tanks used in the sale of furnace and range oil, as soon as financial conditions warrant.

Respectfully submitted,

VIRGILE HOULE, Sealer.

Report of the High School Building Committee

Lewiston, Maine, March 14, 1932

From: The High School Building Committee,
Captain J. O. Fisher, Chairman
Lewiston, Maine.

To The Honorable Harold N. Skelton, Mayor and the
Board of Aldermen, of Lewiston, Maine.

Second Report of the High School Building Committee.
Reference A. Resolution of the City Government, Mar.
31, 1930, appointing the Building Com-
mittee.

Reference B. Preliminary report of the High School
Building Committee September 13, 1931.

Reference C. Minutes of the High School Building
Committee March 11, 1932.

By Reference C. the Chairman was directed to pre-
pare a supplementary report to the Mayor and Board
of Aldermen showing the present status of the appro-
priations made for the construction and equipment of
the new Lewiston High School. I have the honor to
submit the following report as of March 14, 1932.

Referring to Reference B. page 2, it will be noted
that E. F. Maxim Co. is charged with a credit under
date of July 22, 1931 for \$1000. This is explained later
on this same page as follows:

“A credit of \$1000 on the cast stone—due to the
sand finish being substituted for bush hammered finish
called for in the specifications.”

At the time this credit order No. 4 was issued by
the Architect at the direction of the Building Commit-
tee, the Architect, in his forwarding letter dated July
22, 1931 stated as follows:

“The Architect has issued this credit order only
upon demand of the Building Committee and he, the
Architect, does not assume any responsibility for its
issuance nor does he concur with the ideas of the Com-
mittee as expressed in the several letters covering this
subject and forwarded to this office from February 27
to July 18, 1931.”

In view of this comment, and when making a final settlement with the General Contractor, the Committee referred all the correspondence and data in connection with this matter to the Corporation Counsel of the City of Lewiston, Mr. W. H. Clifford who advised, in part, as follows, under date of November 19, 1931:

"In view of the foregoing facts, it is the opinion of the writer that the City of Lewiston is under a potential obligation to pay the General Contractor the sum of \$1000. for a benefit which the City has not and cannot receive, in view of the fact that it is impossible for the cast stone, now a part of the new High School building, to be bush-hammered.

"It is further the opinion of the writer that it is not the fault of the General Contractor. It is the understanding of the writer that John A. Finn & Co. has received their money from the General Contractor. It is the opinion of the writer that the Architect exceeded his authority in authorizing the changes that were made in regard to the cast stone and that the Architect should have notified the Committee and also notified the general contractor of the changes made in the specifications in regard to the cast stone, and that the City of Lewiston should protect itself in the payment of the \$1000. mentioned above as a potential obligation to the general contractor, and retain from the final payment due the Architect the above mentioned sum."

A copy of the Corporation Counsel's complete letter of November 19, 1931 was sent to the Architect and he was notified that \$1000 would be withheld from his commission as per the recommendation of the Corporation Counsel.

Under date of December 11, 1931 the Chairman was directed to convey a compromise offer to the Architect and to the General Contractor in identical terms and request prompt attention on their part. Under date of February 19, 1932 the Contractor agreed to accept the compromise offer while under date of February 29, 1932 this compromise offer was rejected by the Architect.

Accordingly, under date of March 11, 1932, the Compromise offer to both parties was withdrawn and cancelled. It was then voted (1) to pay the E. F. Maxim Co. \$1000 in full for all labor and materials, (2) that the Committee considered that the Architect had been paid in full for all labor and services supplied.

The present standing of the appropriations and expenditures are as follows:

\$828.56

NOTES:—Outstanding Obligations.

An order for the lawn mower has been given but the lawn mower has not yet been delivered.

A \$500 balance is due L. Malo & Sons for the grading upon satisfactory completion of their guarantees in June 1932.

The bill of Montgomery, Ward Co. is held up pending the receipt of certain small articles missing from the original order.

The Committee in addition to the above retains a certified check of the Hall & Knight Company for \$146.90 as a guarantee of no heaving or other evidence of unsatisfactory work in connection with the Athletic Field fence.

The Committee also retains a bond for \$3500 from the United States Fidelity & Guarantee Company issued for the American Window Glass Co. to cover replacement of unsatisfactory glass in the new High School, the work to be done during the vacation period next summer by the F. R. Conant Co. to the satisfaction of the High School Building Committee and without expense to the City of Lewiston.

There are no other outstanding obligations or uncompleted duties under the Resolution of March 31, 1930, Reference A.

The Chairman was authorized at the meeting of March 11, 1932 to pass on the several matters as above in which case there will be only one additional meeting of the Committee for the purpose of submitting a final report to the Mayor and City Government.

This report is forwarded to you in triplicate in order that there may be copies for the incoming Mayor and City Government.

Yours very truly,

Capt. J. O. FISHER, Chairman
High School Building Committee.

ALPHONSE J. BERNARD,
DANIEL McCARTHY,
Engineers.

Year ending February 29, 1932

Report of Supt. of Water Works

To the Honorable Board of Water Commissioners,
Gentlemen:

I have the honor to present to you my report as Superintendent of the Water Department for the fiscal year ending February 29, 1932, this being the 52 annual report.

Construction

Nine extensions have been made during the year at a cost of \$16,296.31, and laying 11,370 feet of pipe as follows:

Sabattus Road, 7,200 feet of 6" C. I. pipe.
Chadbourn Road, 800 feet of 2" galv. pipe.
King Avenue, 1,900 feet of 6" C. I. pipe.
Jones Avenue, 116 feet of 2" galv. pipe.
Bailey Avenue, 325 feet of 2" galv. pipe.
Forest Street, 230 feet of 2" galv. pipe.
Bardwell Street, 325 feet of 2" galv. pipe.
Cote Street, 334 feet of 2" galv. pipe.
Googin Street, 140 feet of 2" galv. pipe.

Six new hydrants have been installed on the Sabattus Road, when that extension was made during the year.

During the year we made 69 new services, 55 relay of services, 18 services cleaned, and 144 services were relayed from the main to the curb. Three sprinkler services.

Streets relayed were as follows:

Union St., Main to College St.
Horton St., Sabattus to Ash St.
Holland St., College to M. C. R. R. tracks.
Park St., Main to Chestnut St.
Chapel St., Main to Lowell St.
Lowell St., from Chapel to Bates St.
Whipple St., from Main to M. C. R. R. tracks.

Respectfully yours,

FRED G. HAYES, Supt.
